

A woman with long, wavy brown hair, wearing a white button-down shirt, is seated at a desk in a bright, modern office. She is looking towards the right, focused on her work. Her hands are on a keyboard. The background is a blurred view of a window with greenery outside.

Front Office Software

Productivity without boundaries

ADP AdvancedMD practice management allows you to create a paperless medical office, seamlessly tied to your billing service's financial platform for a virtually stress-free billing process with automated charge capture.

Far beyond typical front office software, ADP AdvancedMD cloud practice management solutions drive bottom-line benefits with paperless workflow for physicians of all specialties, location count and practice size.

Simplified Workflow

The ADP AdvancedMD system helps front office staff better manage patient and resource scheduling as well as the check-in/checkout process. Deductibles, co-pays, and account balances are easily captured with integrated credit card processing. Insurance cards are scanned and managed directly within patient demographics, eliminating faxing and courier services.

Intuitive, Color-coded Scheduling

Secure cloud access means your staff can update all schedules anytime and anywhere—regardless of how many medical providers, locations or resources you have. Integration with the ADP AdvancedMD medical practice management system delivers one-screen intake, real-time electronic eligibility verification, and crucial financial information handling—including patient balance pop-up memos, online charge slips, instant co-payment and patient portion reporting. It's a complete medical scheduling software system that's color-coded by appointment so it's simple to learn and fast to train.

Improved Communication & Financial Transparency

You can easily improve communications and reporting through HIPAA-compliant messaging. Your staff and billing service personnel can collaborate to clarify any missing or ambiguous information that all gets documented through an audit trail. The ADP AdvancedMD practice management platform provides high transparency to business management reports, available anywhere, anytime through our cloud.

Charge Capture Automation

ADP AdvancedMD includes an optional, full-featured EHR as an integrated solution for faster patient charting and automated charge capture. Charges can also be captured electronically using an online charge slip for faster revenue capture, with reduced potential for error.
